

**Supplement to the typification of names in the genus *Rubus* L. (Rosaceae)
by Heinrich E. Weber**

H. E. Weber

October 2015

A list of lecto- and neotypifications by HEW was posted on www in January 2015. See:

https://www.researchgate.net/publication/270808315_Typification_of_names_in_the_genus_Rubus_L._%28Rosaceae%29

Here are some more typified names erroneously omitted in the previous list. As before, the names are given according to their specific or infraspecific rank in the original publication. In case of infraspecific taxa the epithet of the species is added that was (originally) combined with it. The numbers refer to the publications at the end of the list.

Rubus

- artztii H. Hofm. 4
- baldensis A. Kern. 1
- bollei Focke (neo with G. Matzke-Hajek) 6
- brentonicus Evers 1
- brigantinus Samp. (with E. Monasterio-Huelin) 2
- canariensis Focke (with G. Matzke-Hajek) 6
- castellarnau Pau (with E. Monasterio-Huelin) 2
- cognolensis Evers 1
- coriaceus Evers (maranzae Evers) 1
- crippensis H. Hofm. 4
- denticulatus A. Kern. 3
- henriquesii Samp. (with E. Monasterio-Huelin) 2
- idaeiformis H. Hofm. & Sudre 4
- loppiensis Evers 1
- maranzae Evers 1
- muricolus Sennen (with E. Monasterio-Huelin) 2
- peraticus Samp. (with E. Monasterio-Huelin) 2
- pilosior H. Hofm. (polyanthus P. J. Müll.) 4
- schorleri Artzt & H. Hofm. (obscurus Kaltenb.) 4
- sieberi H. Hofm. 4
- vagabundus Samp. (with E. Monasterio-Huelin) 2
- vezzanensis Evers 1
- warnstorffii Focke ex F. W. Schultz (with G. Stohr) 5

Holo- and lectotypifications of accepted infrageneric taxa.

Types according to art. 22.6 are omitted (e. g. ser. *Nessenses* H. E. Weber > *Rubus nessensis* Hall).

- Ser. *Subcanescentes* H. E. Weber > *Rubus mollis* J. & C. Presl 7
- Ser. *Subrectigeni* H. E. Weber > *Rubus dissimulans* Lindeb. 7
- Ser. *Subsilvatici* (Focke) Focke > *Rubus nemorosus* Hayne & Willd. 7
- Ser. *Subthyrsoidei* (Focke) Focke > *Rubus gothicus* Frid. & Gelert ex E. H. L. Krause 7
- Ser. *Sylvatici* (P. J. Müll.) Focke > *Rubus piletostachys* Gren. & Godr. 8
- Ser. *Vestitusculi* H. E. Weber > *Rubus slesvicensis* Lange 7
- Subsect. *Hiemales* E. H. L. Krause > *Rubus conothyrso* Focke 8
- Subser. *Subrhamnifolii* (Focke) H. E. Weber > *Rubus montanus* Wirtgen 9

- 1 WEBER, H. E. (1998): Some remarks on the bramble flora of the Trentino District (*Rubus* L. Subgen. *Rubus*). – Ann. Mus. Civ. Rovereto **12**: 177-184.
- 2 MONASTERIO-HUELIN Y MACÍA, E. (1992): Revisión taxonómica del género *Rubus* L (Rosaceae) en la Península Ibérica e Islas Baleares. [Thesis]. Madrid. 160 pps. – Since 2005 available via <http://eprints.ucm.es/tesis/19911996/D/1/AD1005201.pdf>
This thesis seems not to meet the requirements for an effective publication according to art. 29. It was probably not distributed to “the general public or at least to scientific institutions with generally accessible libraries” and the electronic form lacks an International Standard Book Number (ISBN).
